ESCC Nominated for Security Sales & Integration's 2018 Integrated Installation of the Year Award!

New York, NY – ESCC has been nominated as a finalist in **Security Sales & Integration (SS&I) Magazine's 23rd Annual Sammy Awards** in the category of "Integrated Installation of the Year."

This prestigious honor places ESCC among the top security and communications companies in the nation for the quality, prestige and technical capability of our work. ESCC was chosen on the merits of our recent completion of "**The House**" at **Cornell Tech** - part of Cornell University's 2-billion-dollar computer, information and engineering campus on Roosevelt Island.

Says Robert Horowitz, President of ESCC, "It is truly an honor to be ranked among the premier integrated installation projects in the country. Our staff is committed to excellence and our work at "The House" at Cornell Tech is yet another example of this dedication. We are truly proud of this achievement."

ESCC Offers Custom Security and Communications Systems for Townhomes

Custom Townhouse Security and Communications Systems by ESCC

New York, NY – ESCC has been designing and installing comprehensive security and communications solutions for some of the finest townhomes for over 30 years.

As providers of custom designed and integrated solutions for luxury residential homes, ESCC prides itself on being at the forefront of security and communications technology as the needs of these residences continue to evolve.

Says Robert Horowitz, President of ESCC, "At ESCC we understand that not only is every home unique but so are the families occupying them. ESCC believes in providing sophisticated security and communications solutions built not just around the design of the home but just as important, the lifestyle of the families within that home."

ESCC provides custom residential security services such as Perimeter Security, IP CCTV, Home Intercom Systems, IoT Technology, Mobile Access Technology, Low Voltage Cabling and Telecommunications Systems.

ESCC Provides Leading-Edge Integrated Security and Communications Systems at 1 Great Jones Alley, NYC

New York, NY – ESCC is nearing completion of a fully integrated security and communications system design and installation at 1 Great Jones Alley in Manhattan's fashionable NoHo district.

The BSKS designed 12-story luxury condominium building (formerly known as 688 Broadway) is located on historic Great Jones Street – a once gritty side street that later turned into one of the epicenters of New York City's artistic community. With notable residents who lived in the area such as Andy Warhol, Jean-Michel Basquiat and Keith Haring, 1 Great Jones Alley was designed to stay in keeping with the look and feel of the surrounding neighborhood.

Says Robert Horowitz, President of ESCC, "1 Great Jones Alley is yet another development that emphasizes being discrete to conform to its surrounding area. In a neighborhood that has fostered such historic creativity it is important that the look and feel of the building is in keeping with the existing architecture of the neighborhood. ESCC's security and communications systems are designed to conform to just these sort of nuanced architectural demands."

ESCC Provides Leading-Edge Integrated Security and Communications Systems at 1 Great Jones Alley, NYC

Integrated Security and Communications Systems for a Discrete Location

Indeed, while the architecture at 1 Great Jones Alley may emphasize discretion, ESCC's security and communications systems were designed to be both low-profile and "out-of-the-way" - all without sacrificing the gold-standard quality that ESCC is known for.

At 1 Great Jones Alley ESCC designed and installed: Access Control systems, IP-Based Video Camera systems, Elevator Access Control systems, Back-of-House (BOH) Communications systems, Perimeter Security, as well as well as an Integrated Intercom system.

Says Horowitz, "As the units at 1 Great Jones Alley aren't traditional door-entry apartments and instead have elevator access from the street level, ESCC was handed an interesting opportunity to showcase our elevator access control systems to provide seamless exit and entry to the units. Our ability to integrate our systems around the elevator access control system was a differentiating aspect of the project in which ESCC was able to both meet and exceed expectations."

Secure Living in NoHo

As 1 Great Jones Alley starts to fill up with new residents, each unit will be waiting for them with the latest in security and communications systems.

Says Horowitz, "1 Great Jones Alley allowed us to showcase the best-in-class security and communications that ESCC takes pride in. These ultra-luxury residences demand both safety and security in a way that is low profile enough to go unnoticed yet sophisticated enough to meet the highest level of security and communications challenges. ESCC was honored to provide our services that in turn give their residents the peace-of-mind that comes with knowing that their building is secure and online 24/7/365."
